Advanced Digital Forensics at Your Fingertips

ProDiscover Pro is a cutting-edge forensic solution that simplifies investigations for digital forensics professionals. From capturing evidence to generating court-ready reports, ProDiscover Pro delivers unparalleled efficiency and precision.

Empowering Investigators Through Every Stage

ProDiscover Pro supports the four critical stages of digital forensics: **Capturing**, **Preserving**, **Analyzing** and **Reporting**.

Key features

Rapid Incident Triage

Quickly identify disk images requiring deeper investigation.

Disk Imaging

Capture a disk image and integrate it into a project effortlessly.

Comprehensive Analysis

Identify hidden files, deleted partitions, and recover critical data.

Remote Evidence Collection

Use Remote Agent to acquire data securely from remote locations over a network.

Advanced Automation

Combine GUI-based tools with scripting for in-depth analysis.

Features That Make ProDiscover Pro Stand Out

- ✓ **Hidden Data Recovery** : Locate hidden files, partitions, and recover deleted data with ease.
- ✓ **Multi-Lingual Support** : Work with ProDiscover Pro in over 10 languages for global compatibility.
- ✓ **AI/ML Integration** : Analyze media files rapidly with integrated AI/ML for thumbnails and video previews.
- ✓ **YARA and Virus Total Integration** : Detect malware efficiently during analysis.
- ✓ **Smart Search Tools** : Customize search folders for different case types, speeding up evidence discovery.
- ✓ **Detailed Reporting** : Generate comprehensive, court-ready reports with visual dashboards and log analytics.

Streamline Your Investigative Process

ProDiscover Pro is your partner in digital forensics, combining precision tools, automation, and intuitive workflows to deliver actionable insights
